Patrick Bower

role frontend   location london   availability now

I'm a London based, front-end developer with a design background. I have a passion for making websites that stand out. I currently work for an agency using modern technologies and practices to deliver projects for a wide range of clients. Working for well-known organisations my goals are for fast, scalable, accessible and eloquent code. Whether embedded in a team or working alone I believe in delivering consistent and quality work. While I currently focus solely on development, my design experience has given me a strong insight into UI/UX. This enables me to contribute ideas and helps me translate design into development. Experience

- **Front End Developer at Digital Detox** `October 2013 - Present` Web development consultancy specialising in bespoke scalable front-end projects for international brands such as Vodafone, Barclays and Bupa.
- **Freelance Developer and Designer** `August 2010 - September 2013` Design and front-end development across a range of sectors. During this period I successfully delivered projects for London agencies including Firebrand, Glock and Cada, completed in-house contracts for brands such as FIFA and ASOS along with maintaining my own client list including U.A.L, Birmingham City Council and Projection Artworks.
- **Designer at King** `January 2008 - June 2010` Design across all web and print mediums, advertising, and marketing campaigns as well as designing for men's streetwear collections.
- **Designer at Design Lab** `February 2007 - December 2008` Design and illustration for clients such as Universal Music, BBC, and THTC Clothing.
- **Internships and Junior Designer roles** `January 2004 - January 2007` Gaining experience from Birmingham based agencies such as Z3, Slingshot, Pin Stripe and TakTak.

Education

- **Birmingham City University** `2001 - 2003` BA, Visual Communication
